Klikit™

MIRROR FIX SYSTEM

It couldn't be simpler

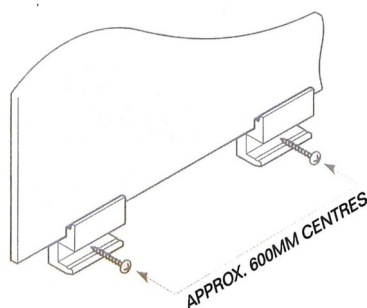

1.

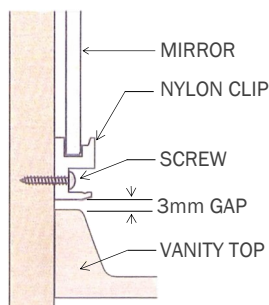

Cut extrusion to width of mirror.
Fit end caps, to cover saw cuts
(caps are identical for each end)

2.

Fit nylon clips to mirror
(top and bottom)
Clips available for
4mm, 5mm and 6mm
thicknesses

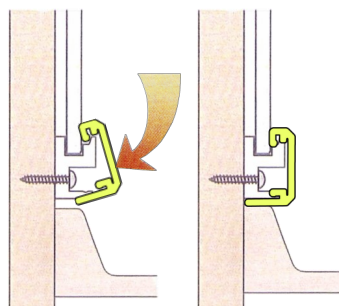

3.

Hold mirror in position, Attach by
screwing mirror clips to wall.
(If above vanity leave a minimum
3mm gap from top to edge unit)

4.

Position KLIKIT™ extrusion,
and "click" home with
heel of hand
(same for top)

NOTE: KLIKIT™ profile adds 33mm to height of mirror

It couldn't look neater
